The future of sunroofs.

This brand new design in automotive sunroofs brings together a robust wind deflector and an ultra-silent motor to produce a quieter sunroof operation and a quieter, more enjoyable ride.

The innovation continues with Twin Venting Glass Panels and Twin Vents in the sunshade to deliver more fresh air than any other conventional sunroof. *You never knew how much fresh air and sunshine you could enjoy!*

The Hollandia Rain Sensor and Soft Touch® electronics enhance the design with intuitive functionality.

TVS 900 ST and STR switch

Control your Environment.

Soft Touch® electronics control the sunroof with just one touch of the button. Tap it once and the panels open. Tap it once to close it. Save your favorite sunroof position to memory for one touch control.

And, with Key-off Auto Close, the sunroof automatically closes when you pull your keys out of the ignition.

Don't Worry about the Rain.

When you're away from your car, and you've left your sunroof open, the Hollandia Rain Sensor will automatically close your sunroof at the first sign of rain showers.

Peace-of-Mind Warranty.

Hollandia TVS™ 900 Twin Vent Sunroof offers a transferrable 3-year/36,000-mile warranty on parts and labor.

Three TVS 900 models are available:

Model	Rain Sensor	Soft Touch® Open	Soft Touch® Close	Key-off Auto Close	Programmable Position	Press-&-Hold Close	Venus® Glass 99.9% UV/IR Protection	Venting	Color-matched Sliding Sunshade	Illuminated Switch
